

# PROGRESS REPORT

**Working Group Name:** Research at TAMU Health

**Working Group #:** 16

**Chair:** Jon Mogford

**Date:** March 25, 2022

---

## **Update on Actions Taken Since Last Report:**

The committee has focused on 3 separate actions to implement the recommendation: 1. organization of the HSC TMC/TMC3 activities with focus on how our work will be coordinated with investments in Fort Worth, Round Rock and South Texas; 2. Developing the Work Breakdown Structure of R&D administrative tasks (e.g., formal partnership agreements, pre/post award work); 3. Developing sustained lines of engagement for intra-system coordination of health-related work (e.g., coordinating with Engineering subject matter experts on medical device testing/evaluation).

## **Next Major Issue to be Addressed:**

Full mapping of roles for divisions/cores resident in the TMC.

## **Problems or Barriers Encountered and Solutions Identified:**

No significant problems/barriers of note at this juncture.

## **Deliverables Completed:**

Mapped the HSC continuum for health/bio R&D and organizational design of HSC-level centers/institutes related to the HSC strategic goals.

## **Timeline for Completion of Remaining Deliverables: \**

Group continues to see no impediment to hitting “Path Forward” milestone dates for organizational charts and alignment of HSC centers/institutes with research activities in the five HSC schools.
