

PROGRESS REPORT

Working Group Name: Consolidate Health Education in the School of Public Health

Working Group #: 19A

Chair: Jon Mogford

Date: March 25, 2022

Update on Actions Taken Since Last Report:

WG19A subgroups have identified the core issues on 1. numbers of undergraduates, 2. Numbers of graduate students (and committee assignments), and 3. Financial/resource support needs.

Next Major Issue to be Addressed:

The committee is maintaining the subgroup construct to complete the focused efforts especially now on fully elucidating the financial/resource implications of the recommendation. Next set of major issues to be addressed include 1. continued discussion on student advisor numbers/support, and 2. developing a fuller plan for facilities transitions and space needs (with respect to both College of Education and School of Public Health).

Problems or Barriers Encountered and Solutions Identified:

A general challenge is the inter-dependence of 19A with other working groups (most notably regarding space/facilities). Awareness and communication between groups is key as is the SIC.

Deliverables Completed:

Accurate mapping of impacted faculty/staff, advisors and students (undergraduate/graduate) is complete.

Near-term deliverables include mapping of advisors and support personnel impacted by the recommendation and fully understanding of facilities options.

Timeline for Completion of Remaining Deliverables:

The WG is on track to complete Path Forward milestones on schedule including organizational charts (March) and financial/budget process (June 1).
